

SPEAKMAN[®]

KITCHEN FAUCETS

the experience speaks for itself

SPEAKMAN®

ELEVATE YOUR KITCHEN WITH SPEAKMAN FAUCETS

Way back in 1869, brothers Allen and Joseph Speakman opened up a modest plumbing workshop in downtown Wilmington, Delaware. With a pioneering spirit and an unwavering dedication to craft, the brothers would create the world's first adjustable shower head, as well as earn over 100 patents for design and innovation.

A lot has changed since 1869, but our passion to innovate has never wavered. Over the years, our team has remained small by design to focus on what we do best. Our techniques have been inherited from past generations. From the design desk to the work bench, each and every item we create continues to be proudly engineered in Glen Mills, PA.

Speakman commercial and hospitality plumbing products are warranted to be free of defects in material and workmanship for 5 years from date of installation. ("Warranty Period"). Speakman warrants to its purchasers only ("Buyer") that goods are sold free from defects in materials and workmanship and conform to Speakman's specifications at the time of manufacturing, provided the goods are properly installed and maintained.

Speakman kitchen faucets make a sleek statement with clean and simple lines. The performance and maneuverability make it easy to deliver water around the kitchen sink. Each faucet is uniquely designed and engineered to intricate standards.

LURA® KITCHEN FAUCET SERIES

Lura kitchen faucets make a sleek statement. Clean and simple lines blend with performance, including a two-function sprayer that delivers great maneuverability and water delivery around the kitchen sink.

SENSOR KITCHEN FAUCET OPERATION

Leave the handle pulled to the side to operate in touch-free mode. Push handle in to deactivate sensor and use in manual mode.

Wave your hand 3 inches in front of the sensor to activate or deactivate the faucet.

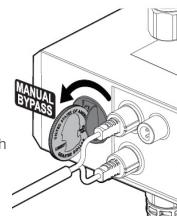

Adjust temperature by handle position, upright for cold or pull down for hot water.

The Sensor uses time of flight technology to determine the distance of objects in its field of view. A red light on the sensor will show for 15 seconds before operation.

The Solenoid Valve is controlled by the sensor. The valve stays closed until it senses hand movement within the field of the sensor. The solenoid will remain open for 240 seconds or once it senses hand movement pass by the sensor for shut off.

Our sensor faucets can work as both a touchless and manual faucet, using the solenoid valve. To adjust to manual operation simply rotate the switch on the solenoid box to manual bypass.

HIGH RISE KITCHEN FAUCETS

LURA® PULL-DOWN

- 1.8 gpm (3.7 lpm)
- Two-function spray adds versatility to cleaning tasks

Speakman is known for reliable innovations in safety, performance showering, and commercial grade fixtures. That same performance and quality is now available under the sink in our line of garbage disposals. The Speakman® 1/2 HP and 3/4 HP will tackle household needs for everyday food disposal. Built to last, the grinding system will finely grind particles to pass through the pipes.

1/2 OR 3/4 HP GARBAGE DISPOSAL

- Continuous feed technology backed by a powerful 1/2 HP 1700 RPM motor to handle kitchen waste with ease
- The compact, space saving design is just 7" in diameter and will increase space available for storage in cabinet
- Durable Permanent Magnet DC Motor for reliable performance
- Included and pre-installed power cord for fast installation; while easily removable for optional hardwiring
- Use with or without a dishwasher, easy tap-in access for dishwasher connection
- Backed by a 5-year warranty

		Volts	HZ	RPM	Amp.	Height	Weight
